

PSST

purdue student **SOFTWARE TRAINERS**

RECAP:

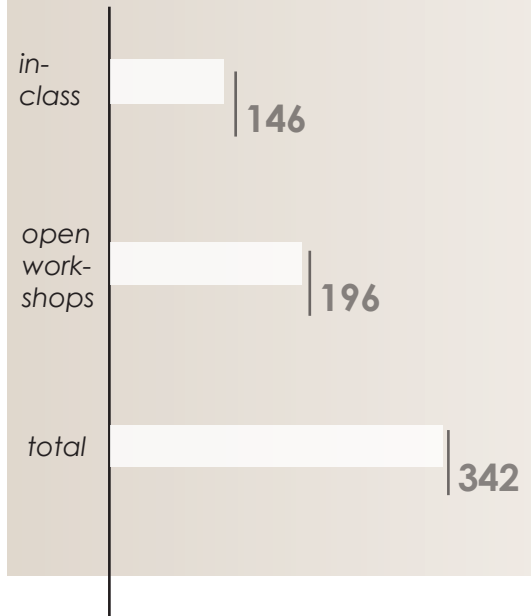

THIS MONTH IN PSST

Welcome to second newsletter of the year! A little about us, for those of you who aren't super familiar with who we are, we're the Purdue Student Software Trainers. We hold weekly open workshops that are open to all students, faculty, and staff here at Purdue. We also offer individual consultations via request. Instructors also can request in-class workshops for their class(es) from us. We support various software ranging from MATLAB and Python to Adobe Photoshop and Illustrator. For the past few weeks, we continued our semester with our Photoshop I and II workshops as well as InDesign workshops. We debuted our new and improved Illustrator workshop too! Our new Excel workshop focusing on Macros is coming up, along with Python and Photoshop for flyer design. We hope to see you at our upcoming events, check down below for more details!
